

LENS TREATMENTS

RECHARGE

Recharge is a premium anti-reflective treatment with the added benefit of blue light filtration. Blue light is emitted by back-lit digital screens and is linked with eye fatigue.

SUPER HiVISION

EX3

Using Super Premium Anti-Reflective (AR) technologies, Hoya has created the most extreme AR product available on the market which outperforms glass.

HiVISION

An oleophobic treatment with added scratch resistance on both the front and back of the lens.

ANTI-REFLECTION with ANTI-FOG

Anti-reflective front side with an anti-fog back side.

Anti-Fog treatments works well with any frame style, but it is particularly effective at reducing the possibility of fogging with frames that feature close fitting or sealed design.

Some examples include:

CLEAR AWAY EASY CLEAN with ANTI-FOG

Oleophobic front side with an anti-fog back side.
