WARNING: It remains the responsibility of the plant owner or safety director to select the proper eyewear protection for each specific safety hazard in the plant. The prescription safety eyewear shown above are not rated for Arc Flash conditions.

The ultimate level of protection for safety prescription eyewear depends not only on the frame, but on the prescription lenses. Refer to the lens monogram to determine the suitability of safety eyewear for each workplace hazard. Only lenses marked "+" provide impact protection that is compliant to ANSI. Plastic and Glass lenses are not impact rated.
