SafeVision

BY HOYA

Featuring  Brand Safety Frames

Special Features (select models)

CLICK AIR GASKETS

The **WX Ozone** model features Click Air Gaskets designed to shield your eyes from harmful debris, while allowing you the freedom to customize airflow through the gasket to clear fogging. The Click Air Gasket creates resistance against fine dirt particles. Push down on the top of the gasket above the nose bridge to open and increase airflow. Click again and lock it down.

DYNAMIC VENTILATION

The **WX Breach** features a Dynamic Ventilation system that works with the Removable Facial Cavity seals to allow control of airflow and reduce fogging. Side vents open to allow air to flow in and behind lenses to clear condensation. Close the side vents to stop airflow.

REMOVABLE FACIAL CAVITY SEALS

Fine dust and pollen, as well as wind, can cause long-term eye irritation. Peripheral light can also diminish optical clarity. Wiley X's removable soft foam Facial Cavity™ Seals block out irritants and peripheral light, protecting the eyes and allowing polarized lenses to perform at peak levels. Included with all models in the **CLIMATE CONTROL** series and with the **XL-1 Advanced** model.

SafeVision is proud to partner with Wiley X, Inc. to bring you a wider selection of brand name prescription safety eyewear frames that meet ANSI Z87.1 standards. As a Veteran founded & family owned business, Wiley X has spent decades innovating and refining protective eyewear. This dedication helps Wiley X inspire confidence in everyone who wears their products – regardless of pursuit. Their commitment to your protection gives you the freedom to feel safe knowing your eyes are protected even in extreme circumstances.

All safety frames featured in this guide meet ANSI Z87.1 standards. Styles that feature removable side shields must have them installed to meet safety standards. Additionally, prescription safety eyewear orders placed via SafeVision with Wiley X frames will be fitted with prescription lenses manufactured at a HOYA optical laboratory. Please note, the following frame styles are not available via SafeVision: WX Saint, WX Saint ALT, WX Valor & WX Grid.
